# Connect the dots in a GitHub repository

*Useful tips when navigating through your repository.*

## Finish

*Congratulations friend, you've completed this course!* 🎉

In this course, you've learned a lot about finding and sharing information. Within a GitHub repository, you can find history about what changes were made, and more importantly, *why* changes were made.

## What's next?

You can enable GitHub Pages and see `docs/index.html` as a website!
